- [APU](#)

Flight Date:

Tuesday, May 24, 2011

Status:

Green

15 of 16 APUs are currently running.

All 16 were running during yesterday's precipitation.

The battery on APU01 was removed overnight for charging. APU01 will be returned to operations later this morning.

The hail insulation will remain on the solar panels today. Some on the units may receive a supplemental charge via a portable generator.
